

Workshops I + II + III

Samstag, 27. August 2022 15:00 (1 Stunde)

Workshop I: Start-up in the natural sciences –from an idea to a bestseller (Seminar Room I)

You have an idea or you see a problem and you are not yet comfortable with current solutions? Then this is your chance to make more of it! See how you can take the first step and turn your idea into a project! How do I develop an idea into a business model? How to find the right co-founders for my project? There is a lot of support! Where can I find it? Be part of it and meet people who are also passionate about “doing”!

Workshop II: Storytelling - but how? How to put your projects in the right spotlight (Seminar Room II)

A summer full of iGEM ...and in the end, it will only take a few minutes in which we will present the results and experiences of the last few months on stage at the Grand Jamboree in Paris. In order to keep the audience engaged from the first to the last second of your presentation, you can use specific techniques to maintain the tension during your presentation. Here you will learn tools that will simplify storytelling and put your project in the spotlight.

Workshop III: GASB Q’n’A - Ask the iGEM experts (Auditorium)

In this Q’n’A session you get the chance to meet two Steering Committee Members of the German Association for Synthetic Biology (GASB e.V.) sharing their expertise in the iGEM competition. Talk and discuss about how to present yourself as a team on the grand Jamboree and learn what is key for a successful iGEM presentation, poster and appearance in Paris. You get the chance to address your questions to experienced iGEMers who have a history of successful iGEM participation.
